Summary

I am an enthusiastic Full Stack Developer, pursuing Masters at University of Texas at Arlington with 2 years of IT experience in Software Development.

Education

University of Texas at Arlington

2019 - Present

MASTERS IN COMPUTER SCIENCE

3.67/4 CGPA

Courses Completed : Design and Analysis Of Algorithms, Data Analysis and Modelling Techniques, Web Data Management

Courses Pursuing : Data Mining, Advanced Database Systems(Big Data), Software Engineering

GITAM University

2013 - 2017

BACHELORS IN COMPUTER SCIENCE AND ENGINEERING

9.01/10 CGPA

Technologies

Programming	C, C++, Java, PHP, Python
Web Technologies	HTML, CSS, Javascript, HTL(AEM)
Frameworks	Bootstrap
Databases	MySQL, SQLite
Tools	Eclipse, CRXDE, PyCharm, Android Studio, Jira, Jenkins, GIT
Some Experience with	JSON, XML, DOM and SAX Parsers, XPATH,XSLT, XQUERY
Others	Proficient in Data Structures and Algorithms

Experience

TATA CONSULTANCY SERVICES

Hyderabad, India

SOFTWARE ENGINEER (AEM DEVELOPER)

July 2017-July 2019

- Working experience with AEM 6.x templates and components, OSGI Services, Clientlibs, Servlets, Sightly, Sling API, JQuery, Bootstrap, HTML and CSS.
- Involved in all phases of software development life cycle(includes development, testing, documentation and maintenance).
- Played a prominent role in developing complete project from scratch using maven and Editable templates.
- In AEM 6.4 - Worked on creating components like Foundation Components Implementation, Reference implementation, Three-level Menu using Servlets, Editable templates and Sightly.
- In AEM 6.2 - Worked on creating complex components like Reference implementation, Sorting pages based on date using sightly, servlets and sling models.
- In AEM 6.2 - Worked on creating editable templates, components with nested multifields, ClientLibs and MSM implementation.

Projects

PEER-TO-PEER FILE SHARING

B.TECH FINAL YEAR PROJECT

- The project is P2P File Sharing Application with chat. This application enables the sharing of computer resources such as files by a direct exchange between end-user's computers.
- Technologies Used : Java, MySQL**

VOCABULARY BUILDER APP

INTERNSHIP | ASPIREVISION TECH EDUCATION PVT. LTD. | MICROSOFT TECHNOLOGY ASSOCIATE

- It is an Internship Project based on "Android Designing and Programming". The application contains around 1000 words which are difficult but common words that appear in academic and business writing.
- Technologies Used : Android, PHP, MySQL**

Achievements

AT WORK PLACE

- Completed "AEM Developer (9A0-384) certification".
- Worked in multiple web applications development projects and also received "Best Team" appreciation from the leadership.
